DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 and 8 are rejected under 35 U. S. C. 102(b) as being anticipated by Bashir et al. (US Pat. 5,930,635, herein after Bashir).

Regarding claims 1, 8, Bashir discloses a method of fabricating complementary bipolar transistors with SiGe base regions, comprising the steps forming on a wafer a first epitaxial layer of silicon region 18 and a second epitaxial layer of silicon region 16 (fig. 1(a)); forming a first crystalline layer of SiGe 26 over the first epitaxial layer of silicon region 18 (fig. 1(b)); and forming a second crystalline layer of SiGe 34 over the second epitaxial layer of silicon region 16 in steps each separate from the other (fig. 1(e)) such that the second crystalline layer of SiGe has a different germanium profile than the first crystalline layer of SiGe (See Abstract and col. 2, lines 27-31). The limitation “a first collector region and a second collector region” does not distinguish over the structure of Bashir because the functional language “collector” is merely a label.

Allowable Subject Matter

2. Claims 2-7 and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
